

If you are interested in applying as an undergraduate student to my lab, please read through this document carefully.

PNB only. My lab is mainly open to students from PNB. The exceptions are students from the Music Cognition specialization in SOTA and the Arts and Sciences program. Sorry, but I am not accepting students from Health Sciences or Life Sciences into the lab and will not supervise theses or any other research courses for students from these programs.

Course background relevant to biological research. My lab is a cognitive neuroscience lab. Therefore I need students who have an appropriate background in the physical and biological sciences. I also need students with specific coursework in neuroscience. I require that students have taken PNB 2XB3 (*Neuroanatomy and Neurophysiology*) and gotten a grade of B+ or higher.

High GPA. I need students with a track record of academic achievement. I tend to give a strong preference to students with cumulative GPA's in the A-range or higher. I will not be able to consider a student having an undergraduate GPA lower than a B.

If you feel that you meet these criteria, please send me your **resume** and a **transcript** (unofficial is fine). Please also write me a paragraph about your long-term career plans and how working in my lab would support them. In addition, please tell me about which area(s) of the lab's research interests you and what knowledge and skills you can bring to a research project in that area.
